Art Unit:

Restriction to one of the following inventions is required under 35 U.S.C. § 121:

I. Claims 1-8 and 10-12, drawn to a method for making a medicament possessing an extended "half-life" "In-vivo" containing various heterocyclic compounds.

II. Claims 14-30, drawn to a method for extending medicament "half-life" "In-vivo" by administering various heterocyclic compounds.

III. Claims 31-44, drawn to therapeutic pharmaceutical composition useful for providing an extended medicament "half-life" "In-vivo" containing various heterocyclic compounds.

Claims contained in Groups I-III are directed to patentably unrelated methods of making, therapeutic methods and therapeutic compositions of matter employing a plurality of distinct compound species.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. § 103 of the other invention.

The above delineated inventions differ as methods of making, pharmaceutical compositions and therapeutic methods; and are independent and patentably distinct

Art Unit:

each from the other. The grouped inventions patentably distinct, a reference which would anticipate, or make obvious, the inventions of groups I-III would not necessarily obviate or anticipate the inventions in the other group. The searches are not co-inclusive as indicated by the diverse nature of the subject matter, thus, would represent an undue burden on Examiner. One skilled in the art would readily practice the invention of one of the above groups without infringing and or practicing the invention of another group. The subject matter is unique and has acquired a separate status in the art and is fully capable of supporting separate patents. For the foregoing reasons restriction is proper for examination purposes.

Applicant is reminded that upon the cancellation of the claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. 1.48 (b) if one or more of the currently named inventors is no longer an inventor if at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently filed petition under 37 C.F.R. 1.48 (b) and by the fee required under 37 C.F.R. 1.17 (h).

Any inquiry concerning this communication should be directed to Russell Travers at telephone number (703) 308-4603.
